How American Owned Chain Stores Gyp Canadian Buyers Managers Fired if They Are Too Honest to Suit the Supervisors—Must be Crooks Witnesses Tell Investigating Committee

OTTAWA, December 1.—An inside story of gyping the public was related to the parliamentary mass-buying commission today. Two former employees of chain stores told of short-weighting customers, short-changing, over charging them and of merchandising tricks like adding salt to sugar and watering the vinegar. They said they were forced into illegal actions or lose their jobs.

While half a dozen women sat open-mouthed and men laughed in amusement, the commission heard the former chain store employees claim they were forced into unethical practices by the constant pressure of the system. "I was asked to be an honest man until he entered the employ of the chain store," said R. A. Sair, a former manager said he was responsible financially for all stock in his store. Sair said he had been employed by the commission to interview store managers and former managers. Finding it impossible to do so, he said as chain store managers found it impossible to balance his stock with his cash, he resorted to the following:

- 1—Unvary customers were short-changed and the cash balanced immediately in case they returned, complaining.
- 2—A woman with a basketful of goods would be over-charged by adding a few cents to her bill and the slip thrown on the floor.
- 3—Packaged goods, such as sugar, fruits and beans were weighed at 15 ounces to the pound. When placed on the shelves the first row would be 16 ounces to the pound in case a government inspector called.

Gordon Gordinsky, a former messenger boy and part-time clerk in a shop managed by Sair, corroborated his short-weight evidence. In addition, Gordinsky admitted the following:

- 1—Adding water to vinegar, one part water to two of vinegar.
- 2—Mixing milk with cream, one bottle of milk to three of cream, sell it as table cream. The necessary caps for the extra bottles were collected by the delivery boys from empty.

John P. Smith, a butcher formerly employed in various chain stores, gave the commission first-hand information on how scales may be manipulated. He said in three chain stores in Canada where he worked, a string was tied to the scales and "we could hold it anywhere we wanted within a three-pound radius."

And it was easy, he added to turn a screw on the scales which would throw it out an ounce to cheat the customer and gain an edge for the store.

Smith said, as a meat department manager, he was expected to make 25 per cent. on the wholesale cost of the meat, at which it was delivered to him with no allowances for trimming and waste.

"How was that done," asked Norman Sommerville, commission counsel.

"In one store, in a high-class residential neighborhood, it was possible to charge more than the list price but in low-class stores, there was only one other way to do it, to short-weight the customer."

It was this constant drive for 25 per cent. mark-up that forced him and other chain store employees to short-weight customers, Smith said, and when he could not maintain it, he was demoted and eventually left.

"Was it done with the knowledge of your supervisor?" Sommerville asked.

Smith replied by telling of the supervisor and his manager—he was a clerk at the time—watching him manipulate the string and then "he gave me a pat on the back and a nice big smile."

Sair went over further, claiming he had been taught the "tricks" by a Chain Store manager, Frank Bigman, while he underwent a period of training.

He said the supervisor in his district told him "he not think for a moment the headoffice does not know what you fellows are doing—there is no trick that goes on in the stores, anywhere that headoffice does not know."

His former chain store manager told of a meeting of managers in the Windsor Hotel, Montreal, which he said was addressed in these words by John Schafman, the general manager:

"Every damned man in this crowd is a crook and we know it."

Sair claimed the Chain Store

managers resorted to illegal practices because they had to balance their stock or their pay and commissions would be docked. He was fired when he would not balance. Gordinsky said he was a full-time employee, part as delivery boy and part time clerk. His salary was \$5 a week. His hours were from 6 a.m. to 7 p.m., Friday until 9 p.m., and all day Saturday until 2 o'clock in the Sunday morning.

He was 19 years of age.

During the 18 months he was in the Chain Stores, there were four managers. Two were fired for short sale and two were transferred. He was ordered to leave a week after R. A. Sair was discharged, business not having been good.

"Did you follow these practices all the time you were with chain stores?" asked Chairman Kennedy.

"Yes, we had to."

"If your evidence you received instructions covering all these practices during your period of training."

"All these tricks I knew during the period of my training. I was instructed by my manager."

Manager of chain stores occasionally got together and "discussed mixing," Sair said.

While he was manager, he sometimes mixed salt and sugar. "I would usually mix five pounds of salt with 100 pounds of sugar."

Sair told of a meeting of Thrift Store managers in the Windsor hotel, Montreal, which was addressed by John Schafman, general manager.

"Sair quoted Schafman as opening his speech with these words: 'Every damned man in this crowd is a crook and we know it.'"

When appointed manager of a store Sair said he was called to the general manager's office. He quoted Schafman as to him:

"You now know most of the tricks and from reports my inspectors give me, I think we will put you in a store as a manager."

"How many managers were at that meeting?" asked U. L. Barbeau.

"About 70."

Sair said he was let out on December 18, 1933, when his stock shortages totalled \$122.53.

Schafman said, Sair related, he could have his job back if he paid cash for the shortages, but this was impossible.

Replying to W. A. Merrill, Sair gave a list of grocers in western Canada where he had been employed, chiefly at Brandon, Man.

"Four evidence to the commission is that you first became a thief when you entered the Chain Stores."

"You have to be a thief to manage a store of the organization," EDITOR'S NOTE—The moral from this investigation would seem to us to be that Canadians should deal at Canadian owned and independently operated stores, the owners of which are known to you, and not send their money across the line. The independent merchant is the one who help you in times of stress, and any profit he makes goes towards building up your home community.

THE BENEFIT DANCE FRIDAY, DECEMBER 21

Owing to the more urgent need of relief this year, it has been decided to again hold the Benefit Dance in the Adelphi Hotel. It has been brought to the attention of the Central Relief Commission that there are this winter many families in need of assistance. Owing to this fact and also assured of the co-operation of Mr. A. T. Lusk and the staff of the Adelphi Hotel, it has been decided to have the dance as usual. The dance will be run same as in the past two years and the same generous support by citizens of town and country will be anticipated. Tickets are now on sale at 50 cents, each, and a cash prize is being given to the holder of the lucky ticket. Bob Paulsen and his Dance Band have donated their services for this dance and The Western Globe and Hesperian Quick Print are co-operating in the printing of tickets, bills, and publicity. As usual, Mr. Emskip has donated the lovely Adelphi ball room and so all money received will be turned over to the Central Relief Commission. Here to provide Christmas hampers of food and clothing, toys and candies to needy families of the town and district.

It is indeed a worthy cause and deserves the whole-hearted support of everyone. If these functions were to be discontinued, there would possibly be many disappointed and unhappy children on Christmas morning. It would surely be a sorrowful Christmas for some of these little kids if good old Santa forgot them. It would be hard to imagine a greater tragedy than that. Even now, these little tots are writing letters to their greatest friend, old Saint Nicholas, and their absolute, childish faith is in him. No one would want to shut his friends to the Western Globe or the Adelphi Hotel and tickets will be mailed to you immediately.

News From the Blindman Valley

RIMBEY NEWS

The Blindman Valley Stages Co. has cancelled its bus service between here and the main line but it is expected that the company will resume operations before the Holiday season.

Mr. and Mrs. Walter Savage have moved from Rimby to their farm in the Montegrean district where Mr. Savage has recently built a new house.

Mr. J. H. Clowen, C.P.R. official passed through Rimby on November 28th on a regular inspection tour. The Leedale Girls' Club met in the Leedale Hall on Nov. 14th with a full attendance. They have decided to hold a bazaar, supper and dance on Saturday, December 15th in the Hall. Taylor's orchestra will furnish the music.

Mrs. L. A. Gunnell of the Chapel district was hostess to the Girls' Club members and other friends of Miss Clara Ellsworth, at a miscellaneous shower, on Nov. 14th, in honor of Miss Ellsworth, a bride-elect. Mrs. Ottar Masang assisted Mrs. Gunnell during the tea hour.

A double wedding dance was held in Leedale hall on Friday and a fine large time is reported. The occasion was in celebration of the double wedding of four residents of the Sunset district who were married in Edmonton, on Nov. 20th. The principals were Miss Helen Skjensberg—Mr. James Solberg; and Miss Emma Solberg—Mr. Hakon Bergerson. Both couples will reside in Sunset district.

The W.A. of the Church of the Epiphany held a very successful tea, sale of cooking and needle work, on the afternoon of Friday, November 30th, and a whist drive on the same evening. All booths were well patronized as was the tea cup reader. The total receipts amounted to more than \$100.00.

A basket social held in Bluff Centre school on November 29th was well attended and the \$25.00 resulting from the sale of lunch baskets will be used for Christmas treats for the children of the district. \$4.00 was the price of the highest selling basket. It was purchased by Mr. Cyril Saunders of Rimby.

Lacombe Pine held a successful dance on Nov. 22nd to raise Christmas funds.

The Church of the Nativity in Rimby has announced the date of its Christmas program and tree for December 19th.

Mrs. E. Moss has opened a grocery store at Iola. This district has been deprived of such a convenience since the fire a few weeks ago which completely destroyed the store and residence of Mark Mittal.

Thousands of pounds of live poultry have been shipped out of Rimby and district during the past few months. The Central Creameries, the Woodland Dairy and Mr. Robert German, of Ponoka, have been among the buyers. December 6-7-8 have been set as dates for buying in

RELIEF CONCERT MONDAY, DECEMBER 17

Arrangements are now well in hand for the Relief Concert to be held in St. Andrew's United Church on Monday, December 17. The committee in charge of arrangements are preparing a concert of unusual merit and one which should be largely attended. Local talent of every kind will take part in this entertainment and the evening will undoubtedly be a most pleasurable one. This year more than in any other year relief is greatly needed, and thus by buying a ticket for this concert you will be helping a most worthy cause. Every cent realized from this concert will go towards assisting needy families in the town and district at Christmas time and throughout the winter when the necessity arises. Coal may be needed, warm clothing is always welcome, a sack of flour, sugar, a few candles for the kitchen, and possibly a toy or two for the children. Your assistance in this enterprise will be greatly appreciated and should also make your Christmas happier, in the knowledge that you have helped someone in poorer circumstances than yourself. Tickets are now on sale. The price is most reasonable, 25c, so get yours today.

CONSERVATIVE CONVENTION

Mrs. P. W. Pratt and Mrs. R. E. Carruthers were elected delegates to attend the Conservative Nominating Convention which meets in Lacombe, today. The Women's meeting which was well attended was held at the home of Mrs. Pratt on Wednesday evening. In addition to Mrs. J. Biglands, of Spruceville, Miss McNab of Woody Nook and Mrs. Grant of Morninside were named Conventions.

Owing to inability of members to meet on date arranged previously, it was decided to change the date to the Fourth Tuesday of each month; the January meeting to be held in the Town Hall.

Plans for a bridge party to be held about the middle of January were left with the Executive to arrange.

Extracts from an address by A. U. G. Bury were read and suggestions made that points stressed therein be made use of as topics of discussion. Refreshments were served by the hostesses at the close of the meeting and a pleasant social hour spent.

MARRIED

Married at the Manse, Lacombe, by Rev. R. B. Layton, on Nov. 26, Arthur Lawrence Stephenson, of Bentley, to Clara Mae Ellsworth, also of Bentley.

On Nov. 26th, William James MacIsaac of Mirror, to Harriett Josephine Neils of Rimbaw.

On Nov. 30th, Walter Elie Proctor of Clive, to Elizabeth Margaret Ross Sutherland, of Morninside.

Your Hangers are worth money. Why not trade them in on Dry Cleaning. Lacombe Laundry and Dry Cleaners.

OBITUARY

Mr. David Tracy

The sudden death of David Tracy, November 22nd, 1934, was a great shock to the community, as he was in his usual good health until the moment he was called Home. He was the son of Alfred Tracy and Eliza Gustick, Claremont, Ont., born November 6, 1891.

After leaving school he was for a number of years in the employ of Brown and Patsen (Employment Manufacturers), Whitby, later in contracting and building business in different parts of Ontario and Moose Jaw, Sask. He came to Alberta about 20 years ago. He was a few years at Central, then retired in Lacombe.

He was married on June 19, 1874, to Rosella Hughes, and to this union were born seven children. His wife, one son and two daughters predeceased him. He is survived by one son and three daughters: Cawick D. Tracy, Tucuma, Wash.; Mrs. James Mitchell, Camrose, Alta.; Mrs. Arthur Cluchy, Boyle, Alta.; Mrs. Algonon Sage, Lacombe. Nineteen grand children and twenty-six great grand children.

Four brothers survive him: Professor Frederick Tracy, Toronto University; Charles C., Hot Springs, Arkansas; Frank, Denver, Colorado; Ralph Floyd, Lacombe. Two sisters: Mrs. Eliza Atkinson, Toronto; Mrs. Fredella Brodie, Chazy, N.Y.

In early manhood he joined the Church of his parents and grand parents, pioneer Baptists, of Ontario. The Lacombe Baptist Church, of which he was a member, was crowded with friends for the funeral service Saturday afternoon.

Rev. Isler, Pastor of the Church, preached a very impressive sermon on "The Life Beyond." Mr. Pickard had charge of the music and played with good expression.

The Pallbearers were: Mr. McCormick, Mr. Minder, Mr. Marshall, Mr. Wilkes, Mr. Dwan, Mr. Lett. The relatives wish to thank all for their kindness.

OFF TO ENGLAND

Miss Alice Insley left last week on a holiday visit to her home in England. She expects to be away two months.

Here's Way Science Now Relieves Pain in Minutes

**BAD HEADACHES, NEURITIS AND RHEUMATIC PAINS
EASED ALMOST AT ONCE**

Remember the pictures below when you want fast relief from pain. Aspirin eases even a bad headache or neuritis often in a few minutes. An Aspirin tablet begins "taking hold" of your pain practically as soon as you swallow it. And Aspirin is safe. For Aspirin does not harm the heart.

Why Aspirin Works So Fast

IN 2 SECONDS BY STOP WATER
An Aspirin tablet starts to disintegrate and go to work.

What happens in these minutes? Aspirin tablets start "taking hold" of pain a few minutes after taking.

When in Pain Remember These Pictures

WORLD HAPPENINGS BRIEFLY TOLD

The Lancashire cotton mills have removed their embargo on exportation of British cotton goods to Germany.

The British House of Commons, debating the betting and lotteries bill, permitted an amendment in favor of rejecting state lotteries. The vote was 219 to 47.

Oskar Hoffman, accused of partial responsibility for the recent hunger strike of coal miners at Peck, Hungary, hurried himself to death from the third floor of police headquarters.

Recommendation that reciprocal trade negotiations between Canada and the United States be instituted without delay was made in a resolution approved by the national foreign trade convention at New York.

U.S. Agricultural Adjustment Administration officials are striving to ascertain the cattle feed supply needed this winter. It is expected most of this feed will be purchased in Canada.

France has not approached Great Britain on the question of sending British troops to the Saar, nor has participation of such troops in connection with the forthcoming plebiscite ever been considered, it was officially stated in London.

A spokesman of the Japanese foreign office, commenting on "suspicions" expressed at Geneva that Pacific islands administered under a mandate are being fortified to-day, denied the accusations as being groundless.

Seventy-five of the finest paintings of the Royal Canadian Academy will be exhibited throughout Canada under the National Art gallery's auspices. Decision to undertake such an exhibition was made in Toronto at the 55th annual meeting of the academy.

Windfall For Villagers

Struggling Fishermen Own Mountain Containing Materials For Cement

The villagers of Matsugawa-mura, near Moji, have been poverty-stricken as long as anyone can remember. They live on a desolate stretch of coast. Life has always been one long struggle to make ends meet by fishing. But now they are all rich. A mountain nearby—which was part of the common land belonging to the villagers—was found to contain silica, lime and alumina, the raw materials for cement. And so two cement companies have paid the villagers \$36,000 for it. The sum of \$23,750—an immense one to these poor fishermen—is being shared by the villagers—those who have lived at Matsugawa-mura longest will receive most.

There are more Jews in the United States than in any other country in the world.

A scientist in Australia is melting old automobile tires into a high-grade printing ink.

QUIVERING NERVES

When you are just on edge . . . when you can't stand the children's noise . . . when everything you do is a burden . . . when you are irritable and blue . . . try Lydia E. Pinkham's Vegetable Compound. 98 out of 100 women report benefit.

It will give you just the extra energy you need. Life will seem worth living again. Don't endure another day without the help this medicine can give. Get a bottle from your druggist today.

VEGETABLE COMPOUND**

Little Journeys In Science

THE SECRET OF THE FIREFLY

(By Gordon H. Guest, M.A.)

Light is produced by numerous living creatures, such as the firefly, the glow-worm, and certain varieties of squid and fish. This light is accompanied by very little heat and hence is called cold light. The search for heatless illumination is a fascinating one because cold light is more efficient than electric light. If the scientist can discover completely the secret of the firefly, he will be able to produce light much cheaper than warm light. At the present time the consumer of electricity for the production of light pays not only for the light, but also for the heat which is always given off along with the light.

The bodies of animals have a marvelous mechanism for the changing of foods into heat, and in certain cases into light and electricity. A steady combustion takes place within the body of an animal during its entire lifetime and it possesses efficient heat-regulation so that it is quite independent of outside conditions. The firefly's light, and electric fish can generate sufficient electricity to ring a door-bell.

There are a great many light-producing organisms. Scientists have found that there are at least two orders of animals which contain one or more light-producing forms, and that there are two groups of plants, namely fungi and bacteria, which are luminescent. Fireflies, glow-worms, jellyfish, brittle-stars, mollusks, and squid are light-producing organisms. It has been observed that even the eggs of some animals are luminescent. Light-producing animals are never found in fresh water, but they all live in the sea or on land. Most of the luminescent plants and animals found many feet below the surface.

The glow of damp wood (known as fox-fire) is due to the presence of a fungus. The phosphorescence of dead meat or fish is caused by bacteria. It has been only in recent times, since scientists have perfected the microscope, that the phosphorescence of dead meat and that of dead fish and meat have been shown to be due to different forms of living organisms.

Competing With Royalty

Prince Of Wales Exhibiting Cattle At Chicago Show

Farmer Brown of Pumpkin Centre is going to compete with His Royal Highness the Prince of Wales at Chicago in December. The occasion will be the International Livestock Exposition, which opens December 1. The show has received the entry of the prince as an exhibitor by way of a telegram from the prince's ranch in Alberta, listing entries for the Shorthorn cattle competitions.

Christmas Seals Protect Children From Tuberculosis

MONEY RECEIVED FROM SALES PROVIDES FUNDS FOR PREVENTIVE WORK WHICH HAS BEEN INSTRUMENTAL IN DECREASING DEATH-RATE BY 25% IN PAST FOUR YEARS—TAXATION PROVIDES FOR CARE OF SICK ONLY; CHRISTMAS SEAL SALE PROVIDES OPPORTUNITY FOR ALL TO HELP THIS WORTHY CAUSE.

The mother of this healthy, winsome child was a patient in the "Barr" when he was born. But, thanks to the preventive work of the Saskatchewan Anti-Tuberculosis League, he is as free from this disease today as any other normal child.

He is one of nine babies cared for in the Preventorium at Fort San this year, with the assistance of the I.O.D.E. and funds raised by the sale of Christmas Seals.

The preventive program of 1933, financed from the sale of Christmas Seals, was one of the most extensive yet attempted.

235 persons were examined at the three Sanatoria. 2080 cases were diagnosed at City Clinics. 1220 persons were examined by Travelling Consultants. 619 Normal School Students were examined. 638 contacts were examined by Family Physicians.

In all, 7384 persons received necessary care and attention, thanks to the generous contributions of purchasers of these cheerful little good-will messengers.

Since 1928, when Christmas Seals were first sold in Saskatchewan, 29,973 persons have been examined as a result of this program, which is the largest of the Christmas Seal Preventive Fund.

Of the total number of persons examined, 2,884 active cases of tuberculosis were discovered while the disease was yet in its early stages. Were it not for the Christmas Seal Campaign this large group of children and young adults would eventually have reached the Sanatoria in the advanced stages of the disease. Other healthy children would have been infected by them as tuberculosis is spread by contact with those suffering from tuberculosis.

Deaths, sicknesses, and infection from tuberculosis have been reduced as a result of this program, which is supported by funds secured from the sale of Christmas Seals.

The death rate in Saskatchewan has been reduced 25% in the last four years, largely as a result of preventive work, and this province today has the lowest death rate in the world.

Yet, in spite of this splendid showing, there were three hundred deaths from tuberculosis in Saskatchewan.

TEETHING FEVER Relieved

Mrs. Edward James' baby had two teeth when less than three months old. She writes: "The baby is now and I can truthfully say that while putting his teeth he has not been a restless feverish time for babies but the little one can always be soothed and the fever reduced by giving sweet, safe Baby's Own Tablets. They are safe, no after effects. Price 25c everywhere."

Dr. Williams' Baby's Own Tablets

Thrives In Canada

Hungarian Partridge Has Taken Place Of Pheasant Quail

Where once the hardy Northwestern quail—friend of the farmer and delight of the sportsman—basked and warbled his melodious charm, a new bird has appeared to claim long-barren cover.

The Hungarian partridge, the quail's foreign relative whose name is a misnomer (he came from Belgium), is making gains daily.

"Bob-white, bob-bob-white," a roadside song that provides music to many hungry pilot thirty years ago has slowly faded. Target for the sportsman's guns, with the farmer destroying nesting cover and the loss of natural enemies unabated, Bob White fought an uphill battle.

But the Hungarian partridge possesses merits for each of his many bad points, and the plucky bird has broadened his habitat to cover Saskatchewan, Manitoba, Alberta, Minnesota, Iowa, Wisconsin, North Dakota, South Dakota and other mid-west states.

Tossed into America's wild-life panorama fifteen years ago by a group of hunting enthusiasts, the Hungarian has thrived. His shrill song, "Kee-uck, kee-uck," already is common.

Of larger stature than Bob White the Hungarian is a whirling rocket on the wing.

The partridge's domestic habits are commendable. He makes friends with the farmer by destroying insects and weed seed. He loves desolate prairie and cleared land for nesting at a time when brush-covered woodlands are growing increasingly rare.

Sportsmen, conservationists, farmer and the casual observer who attaches no special value to all wild creatures have signed the Hungarian partridge's naturalization papers.

An aeroplane would have to travel 750 miles an hour to keep up with sound.

Canadian Farmers' Business Organizations

Compiling Information Regarding Farmers' Co-operative Movement

Farmers' Business Organizations in Canada is the title of the latest bulletin issued by the Dominion Department of Agriculture. Since one of the purposes for which the Economics Branch of the Department was established was to study the farmers' co-operative movement, it was felt that the first step to be taken was the acquisition of all the information possible on the activities of such agencies in Canada. To that end arrangements were made for a survey of existing organizations.

Information was sought from all farmer-owned and controlled associations, companies, societies, and clubs actively engaged in business, regardless of their methods of operation or form of organization. The information thus obtained has been summarized and will be found in the 64 pages of the bulletin. It is expected that a similar survey will be undertaken annually or at intervals of a few years, and that the information will form the basis for a permanent record of co-operative activities. The bulletin may be obtained on request from the Publications Branch, Dominion Department of Agriculture, Ottawa.

Public Works Program

Construction Of Dams and Irrigation Projects For Drouth Areas

A 10-year public works program to include construction of dams and irrigation projects and financial aid to farmers in the district were endorsed by the United Farmers of Manitoba for the drouth area in the southwestern section of the province.

Endorsement of the resolution was voted after Premier John Bracken of Manitoba had outlined the aid being extended to farmers in the area and urged a joint commission of federal and provincial governments to study the whole western drouth situation.

The resolution urged action to maintain farmers still remaining in the drouth areas and to facilitate the return of those who have already quit their farms. Beside a water conservation program, suggested reforestation of all lands suitable for forest growth. The Dominion and provincial governments should initiate the program.

Argentina Is Blamed

Alleged "Dumping" Of Wheat Affected Price States Commission

Alleged "dumping" of Argentine wheat on world markets was held by members of the wheat commission as responsible for the falling off of world prices since the commission's last meeting in London.

Trade figures showing Argentine wheat exports of approximately 50,000,000 bushels during the first quarter of the new cereal year, which started August 1, caused pessimism concerning possible agreement at the reconvening of the wheat conference in Budapest, November 2.

It had been hoped Argentina would accept an annual quota of 150,000,000 bushels.

While some members were still hopeful that this proposed quota would prove satisfactory, others insisted they would rather abandon the wheat agreement than have quotas adopted and then broken as they were last year.

Grandmother's Remedy Still Good Today

Coarse Roughened Skin Unnecessarily

The ideal, healthy, protective skin since 1875, Hinds Honey and Almond Cream makes unnecessary red, rough-scrubbed hands, and complexion caused by outdoor exposure. Women use Hinds Honey and Almond Cream, as a preventive measure against the roughening of the skin. Apply this delightful fragrant, soothing lotion. Notice how quickly it is absorbed. The delicate, delicate touch of the cream gives instant relief to chapped hands, and healing in rapid and complete. If you believe in "an ounce of prevention" apply Hinds Honey and Almond Cream before exposing your skin to red, damp weather and cold winds.

Delightfully cool, soothing and softening in effect, Hinds Honey and Almond Cream affords adequate protection against rough skin, smooth, soft and white through the roughest work or weather.

Chicken feathers are the latest source of raw material for plastic to be made into fountain pens, buttons, decorative novelties and other items.

Lawns of real grass have been put on top of the vans of a Berlin butter merchant, the idea being to keep the interior of the van cool.

The inventor of a salt cellar that will always have salt in it will supply a long-felt want.

The giant spider crabs of Japan weigh up to 30 pounds.

for CHAPPED SKIN
Dissolve Mince's with one-half ounce of water. For Face Cream use the same. For Body Lotion use the same. No trouble. Very healing.

HANDWRITING REVEALS SECRETS OF CHARACTER

By LAWRENCE HIBBERT
(Grapho-Analyst)

(All Rights Reserved)

(Editor's Note: A great deal of comment has been aroused by these articles on Character from Handwriting, by Lawrence Hibbert, and we are asking for a personal analysis of their own writing, and the author will analyze yours. Use the coupon at the foot of this article.)

To the hundreds of readers who have written to express their appreciation for personal character analyses and to comment on the often uncanny accuracy of the delineations, I would like to take this opportunity of thanking them.

And, at the same time, to add a word of advice. The utmost value of their methods of analysis is only obtained by those who act on the advice suggested in their analysis. It is one thing to "learn of your weak points" and to be shown wherein lie your strongest characteristics. But it is quite another thing to act on them! And that is where the real personal value of Grapho-Analyses comes in.

I have a letter this week from a young lady who, for personal reasons does not wish me to send her a letter direct. She asks that I reply in this column. And, because the subject is one that will interest a great many readers, I am very glad to do so.

Miss J. Winnipeg writes: I am very much in love with a man who is married. My parents know that I go about with this man, and are causing a great deal of trouble in my home. I am 20 years of age, and this is the first really serious love affair I have had, but it means everything to me. The man I love says that he is not happy with his wife. He talks about getting a divorce. But he says, this is not possible at the present time. I do not want to get him up, but I would like your advice, as it may help me to do the right thing.

Dear Miss J., I send me your own writing, and that of the man with whom you are in love, but you do not want to send me the letter. And, after all, she is very important in this triangle.

First direct. She asks that I reply in this column. And, because the subject is one that will interest a great many readers, I am very glad to do so.

His writing shows that he is a very competent, keen minded person, with a great deal of enthusiasm, and a rather dominant will—of the kind that does not like resistance to his own opinions.

He is very strongly emotional, and of what I will call, a "physical" type of man. There is lots of colour in his nature, and he is very fond of the good things of life. But there is very little generosity shown.

Your own writing shows a very ardent and warm-hearted nature. You do things on the impulse of the moment, and are very responsive to emotional appeals. You crave affection, and would not be happy for long without it.

You are generous and sympathetic, and always glad to do things for others.

My advice to you is to give up your gentleman friend. It is not necessary for me to go to all the trouble of the wife, to give this opinion.

Your nature is not compatible with that of the man. You have been overdone by a feeling of sympathy for him, which has gradually grown into a form of love for him. But it is not a lasting love.

Give him up, and you will not regret the passing of this, your first serious affair. The feeling for you is undoubtedly temporary—the infatuation of a man much older than you, and a young, and probably pretty girl.

Do not spoil your life because of a temporary emotional urge.

Do you want your character analyzed? The author will tell you what you are really like. And he can tell you the truth about your friends. Send me your writing, from which I will analyze, and enclose 10c for each specimen. Send with 5 stamps and address envelope, to: Lawrence Hibbert, c/o Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg, Man. Letters are held confidential and will be answered as soon as possible, but please allow about two weeks for your reply.

Scottish Musical Players

Second Transcontinental Tour Is Hailed With Pleasure

It is little more than amazing to find that the Scottish Musical Players, which opened their second transcontinental tour at the Majestic Theatre, Montreal, two years ago, are still so popular. The same company of artists at last season comprised Mary McMahon, Edith McQuinn, William T. Wilson, McAllister Wallace, Florence Reid, Randolph Salmons, and Ann Forsythe.

Their presentation of the "Bonnie Briar Bush," and "Tam O'Shanter" are marked by a whole hearted enthusiasm on the part of each individual performer. This season a new play has been added to the repertoire in "Bonnie Prince Charlie."

If this presentation no attempt has been made to follow the fortunes of "Bonnie Prince Charlie" than from cull incidents, and into which has been introduced many of the stirring incidents of the battle of Cullin.

Their presentation of the "Bonnie Briar Bush," and "Tam O'Shanter" are marked by a whole hearted enthusiasm on the part of each individual performer. This season a new play has been added to the repertoire in "Bonnie Prince Charlie."

Approximately 500,000,000 silver dollars are stacked up in the mints of the United States; these "cartwheels" are in common use only in the west.

It's the Old Story

Ogden's Fine Cut Cigarette Tobacco and "Chanticleer" or "Vogue" papers—a story that every man who "rolls his own" is certain to enjoy.

There's pleasure to spare in every chapter of it—the downright pleasure of seeing rolling and cooler, more fragrant smoking Ogden's Fine Cut always gives.

Just let Ogden tell you the old rolled story. A cigarette rolled with Ogden's Fine Cut and "Chanticleer" or "Vogue" papers will tell you volumes about smoking satisfaction—in the language you like best.

SAVE THE POKER HANDS
OGDEN'S FINE CUT

P.S.—At any POKER HAND Premium Store or by mail, you can get a large booklet of "Vogue" or "Chanticleer" cigarette papers for one complete set of POKER Hands.

Your Pipe Knows Ogden's Cut Plug

Empire Air Routes

Sir Philip Sassoon Says Flying Time Must Be Speeded Up

Flying times on the long-distance Empire air routes must be progressed and drastically reduced, declared Sir Philip Sassoon, British under-secretary for air, on his return from a tour as far as Singapore, longest air tour ever undertaken by a government official.

The air ministry, the post office and Imperial Airways had reached the conclusion schedules must be speeded up, said Sir Philip. Measures particularly must be taken for development of the air mail service, he added, with extension of night flying. Sir Philip, an aviation enthusiast, said he had often landed at night-time and he considered commercial night-flying was a practical proposition.

Large Orchards In Europe

Immense orchard near Milan boasts of 74 miles of pear trees and 31 miles of peach trees which are being cultivated under the most modern conditions. The orchard is one of the largest in Europe, having 200,000 pear and 6,000 peach boughs. Several varieties of each fruit have been planted in order to determine the best suited to soil and climate.

Cultivation Of Seaweed

How to scientifically cultivate seaweed may be studied by Philippine Government authorities. Seaweeds, or edible algae, abound in the coastal regions of the archipelago and are used in preparing salads, soups and pickles. The Fish and Game Administration has been directed to collect data regarding the extent of the present seaweed industry.

England now has 55,000 doctors, 15,000 more than in 1912.

...Helps to AVOID MANY COLDS altogether

VICKS VAPORUB
for
Nose & Throat

Quick!—At that first nasal irritation, sniffle or sneeze—just a few drops of Vicks Vapo-rub. It stimulates the functions provided by Nature—in the nose—to prevent colds, and to throw off colds in their early stages. Used in time, Vapo-rub helps to avoid many colds entirely.

Where irritation has led to a clogged-up nose (a stuffy head, cold or nasal catarrh) Vapo-rub penetrates deep into the nasal passages, reduces swollen membranes, clears away clogging mucus—brings comfort and relief.

VICKS PLAN FOR BETTER CONTROL OF COLDS

THE TENDERFOOT

By
GEORGE B. RODNEY
Author of "The Colorado Trail",
"The Canyon Trail", Etc.

SYNOPSIS

"You've fallen over to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

But Keene decided to see what was happening for himself—not as Gerald Keene, half owner of the Hour-Glass Ranch, but as Duro Spaulding, tenderfoot in a Montgomery Ward without one.

Dad Kane, desert rat and luckless prospector, is returning to tell Dustin and Spike Goddard, owners of the Broken Spur ranch, who had grubbed-out him, of his discovery of a rich gold mine, and whose enemies of the mine had then to kill him.

(Now On With The Story)

CHAPTER IV—Continued

Kane nodded. His conscience was by no means clear. He knew that he had spoken unguardedly and he remembered how interested Raynor had been.

"Of course Spike and I are going to stake you," said Dustin. "But we've got to know more than we know now. A big mine'll cost money. We've got to be able to show the goods to capital. See? When can you take me up there to see the place?"

Kane eyed him but Dustin's face was impassive. After all his demand was only reasonable. No one could expect men to "buy a pig in a poke."

He nodded quietly.

"Give me a couple of days," he said. "Then I'll hike back up there and take you with me. I'll show it to you. Just you and me, hey?"

"That's all. We'll take a pack-pony for grub. I've got some business to tend to before I go."

He stopped Spike Goddard midway between the house and the corral and told him his plan.

"You mean you're going out into the hills with that old rat by yourself? No one else? Then he don't come back? That's taken a most God awful chance," said Spike who knew. But Dustin frowned him down.

"I mean that I'm going out into the hills with old Dad Kane to look into a prospect with him. I want Peyotl Gregg to go with us. If any accident should happen to Kane, it will not be my fault, will it? I'll be leaving with him on Monday. In the meantime, Spike, I've got some of

man Carr's hirtin' anything that wears pants. Look at Lee. . . .

Lee started as though stung and regarded him passionately.

"Have he come back," said Spears. "Reckon he's hired?"

"As the newcomer strode back to them they examined him more carefully.

Beautifully tooled boots adorned with silver-lined Mexican spurs covered his feet. Immaculate white goatskin chaps covered blue denim pants. . . . That was as it should be. . . . A blue silk shirt lay open at the neck where its gap was filled with a scarlet neckerchief. A four-inch alligator's skin belt, carried a row of shining brass cartridges and an open holster, in which lay a heavy six-gun with a walnut handle. Lee noted three new notions filed across the wood and he grinned. Port alone took one look at the man's face that was tanned to the color of a young peewee and looked puzzled. That face did not agree with the blatant newness of the equipment. The mouth was wide and mobile, the nose had just a touch of the aquiline; enough to give character to the face. No two men ever quite agreed about the eyes. They were certainly slate-gray with sparks of hazel light in them like cat's-eyes but there was, too, a sort of dancing, playful light that might be deceptive. He swept off a twenty-dollar Stetson and half-nodded.

"My name's Stone, gentlemen," he said quietly.

"Spell it with an S I reckon," said Baines who passed as the bunk-house wit.

"No, sir. . . . The man's eyes lit a little and he half-grinned. "I've always spelled it with a U. . . . UB, you know! You-be-damned Stone. . . . Mr. Carr says I'm hired."

"All right, Mr. You-be-damned Stone. Pitch your bar-bag in the bunk-house. You got another name?"

"Two of 'em. But I reckon Stone's enough. Outside they call me Duro. That means, hard, I hear. Makes my name Hard Stone."

(To Be Continued)

Venom Of Snakes

Doctors Discover New Treatment For Uncontrollable Bleeding

The venom of snakes may possess mysterious properties helpful in the treatment of haemophilia, it was indicated by the researches of two British physicians.

A new treatment for the disease—an uncontrollable bleeding from which the sons of former King Alfonso of Spain are sufferers—was described in the *Lancet*, English medical journal, by Sir R. G. MacFadyen and Murray Barry.

The physicians based their study of the hitherto incurable malady on the knowledge that the poisons of many snakes cause blood to clot. After numerous tests they found the venom of the viper to be most effective for their purposes. From it they developed what they believed to be a safe technique in the treatment of the disease.

Home Of Many Watches

Lovely Timepieces Made in Liverpool, England, Years Ago

Liverpool, England, was the home of many large watch manufacturers in the eighteenth and nineteenth centuries; here lovely watches were made and many of them came to America; these were all most famous and rather large. Women were worn on black silk cords and they were wound with tiny gold keys. The cases were receptacles for pictures of loved ones. The tiny screw holes in the works were often set with semi-precious stones and many of them, although nearly two hundred years old, still keep correct time.

Trapped By "Want Ad"

Police of Springfield, Missouri, used a newspaper want ad to trap a house prowler who had stolen an electric sewing machine. The ad read: "Will exchange model T Ford for an electric sewing machine." The prowler "fell" for the ad and promptly showed up at the home of a city detective who placed him under arrest and recovered the sewing machine for its owner.

Among the Japanese people there is no demand for hair dye other than black, says the U.S. Department of Commerce.

PUMPKIN PIE—the sure route to any man's heart during the late fall and early winter season. With PURITY FLOUR the tempting filling awaits your pleasure in a golden brown pastry that is light, flaky and delicious in flavor. For all other kinds of baking you'll find the utmost in satisfaction. Cakes made from it are even in texture, light and flavorful. Bread, rolls and biscuits from the oven just filled with appetite appeal. There's new satisfaction and a guaranteed uniformity of constant high quality when PURITY, the all-purpose flour, is used for all your baking.

Why at 40 You Think You're "GROWING OLD"

It's Frequently Just an "Idea." Not "Old Age." And According to Scientists, May be Something No More Alarming Than A Touch Of Acid Stomach

At about 40, many people think they're "growing old." They're tired a lot. Have headaches. Stomach upsets. Dizziness. Nausea.

Well, scientists say the cause, in a great many cases, is merely an acid condition of the stomach. The thing to do is simply to neutralize the excess stomach acidity.

When you have one of these acid stomach upsets, all you do is take Phillips' Milk of Magnesia after meals and before going to bed.

Try this. You'll feel like another person. Take either the familiar liquid "PHILLIPS", or the convenient new Phillips' Milk of Magnesia Tablets. Made in Canada.

PHILLIPS' Milk of Magnesia

Work Among Treaty Indians

Canada Has Faithfully Fulfilled Trust In This Respect

Canada has been faithful to her trust regarding the 112,000 treaty Indians in the country according to Herbert N. Awrey, Department of Indian Affairs, who addressed the Rotary Club in Ottawa.

Mr. Awrey who is known to the Indians of Northern Ontario as "Shunika Ogema," or "Big Money Man," described his adventures as an Indian Commissioner deputed to pay the Indians the money guaranteed to them by treaty with the government.

Pointing out that eleven treaties had been signed with the Indians since Confederation, Mr. Awrey remarked that in 1933, \$4,088,000 had been expended on them plus \$650,000 interest from funds held in trust for them by the Dominion and \$234,000 in annuities.

Tracts of land had been wisely set aside at the outset for the Indians where they could live in communities and now there were 2,200 of these reserves in Canada. Money from land or timber sold was held in trust by the government and the fund now totalled \$13,800,000. Interest from this amount goes to the Indians. This provision for education is also generous.

R. J. C. Sted had thanked the speaker and expressed the view that other government employees should outline the work they carry out with such integrity and regard for the public interest.

Plenty Of Work Ahead

Will Be Over Year Before "Queen Mary" Ready For Service

Although many of the Queen Mary's "black squad" will be thrown idle or diverted to other jobs following upon the vessel's successful launch on September 26 it is estimated that about 3,000 men will still find employment for more than a year ahead.

There is a great amount of work yet to be undertaken in transforming the giant steel hull into a floating luxury hotel, and there will be few idle moments between now and the spring of 1936, when according to schedule, she should enter the North Atlantic service.

Cuban baking methods require the use of a flour with a high content of fine-quality gluten. Flour milled from Canadian wheat satisfies this requirement and consequently 70 per cent of the imports are of flour made from Canadian wheat.

No Damages For Negligence

Careless People Cannot Expect Compensation For Injuries

In an action tried in Ontario before a Middlesex jury the other day, in which damages for injuries were asked, a verdict was given that will have a very widespread effect on all cases of compensation for injuries suffered. Suit was entered against the Melbourne Agricultural Society by a father on behalf of his son, 10 years old, who was injured on the racetrack at the fair. In spite of warnings given to keep off the track through a loudspeaker he persisted in getting into the zone of danger, with the result that he was knocked down by a racehorse, receiving injuries to his knee.

The jury deliberated on the case and found that the boy had suffered on account of his own carelessness and, hence, was not entitled to damages.

The significance of the verdict is that it throws the responsibility on people themselves for exercising reasonable caution. If they are careless and negligent they cannot expect to collect damages from others on the ground that the latter are responsible for their safety. It is possible that if this principle were pressed more energetically there would be fewer accidents.—Brantford Expositor.

Started In Curious Way

British House Of Commons Burned

A hundred years ago, on Oct. 18, 1834, the House of Commons was burned down. The great-grandfather of the present Lord Beaconsfield, Governor-General of Canada, performed feats of valor at the fire. He was then 17, for Nottingham.

He climbed on the roof to direct the hose, in spite of the smoke, heat, water, and molten lead flowing around him. He was begged to come down, but did so only two minutes before the whole of the roof collapsed.

The fire started in a curious fashion. Until 1827 it was the practice of the Treasury to issue wooden "tallies" as acknowledgments for loans to the government.

Tallies were made by splitting a strip of wood in two, one part being retained by the treasury and the other being issued to the lender, who returned it when he repaid his loan.

It was the custom to store discharged tallies in the cellars of the House of Commons, and it was among them that the fire broke out. Paper acknowledgments were substituted for tallies in 1827.—News of the World.

THE RHYMING OPTIMIST

By Aline Michaels

WITH SINGLE AIM

His feet were guided day by day By purpose clear and bright, He let no trials bar the way, No pleasures cloud the light.

With single thought and aim he went, With steadfast mind and soul; He battled for no cheap content, The vision of his goal.

And happiness like sunlight fell Along the paths he chose; His purpose won a potent spell, Disarming all his foes.

For him life held an ordered plan, Hours sped serenely on, Each day in shining sequence ran To greet the morrow's dawn.

His hope, a star within his breast, A fixed star, white and pure, Made each dawn brighter than the rest, Each step more firm and sure!

Sopwith Is Real Sport

Admits Mistakes And Says He May Challenge Again

Mr. Sopwith, in his return to England, informed the press that the reason he had not the American cup with him was that he had made more mistakes than his opponent. This sportsmanlike statement was accompanied by the remark that he was prepared to challenge again. Perhaps the next time he will be successful. His Endeavour proved herself to be the superior of the Rainbow in many respects, a fact which was admitted by numerous American yachtsmen. In any event, his words are of a nature to remove any ill-feeling that may have grown out of the technical protests.—Montreal Gazette.

Golf Came First

A Scotsman was a devotee of golf. His wife remonstrated with him, but found it unavailing. Finally, she delivered an ultimatum. "Bandy, if you do not play less golf I'll leave you," she said. There was no audible reply, but she presently overheard her husband soliloquizing, "Gosh, I am going to miss her."

Mrs. Flynn—"This neighborhood seems pretty noisy, Mrs. O'Brien."

Mrs. O'Brien—"Yes; the only time there's any peace here is when the trans drop the noise."

Out of every 100 marriages in the United States, 32 are childless.

W. N. U. 2012

"WHY RISK FAILURES WITH DOUBTFUL BAKING POWDER. LESS THAN 1/4 WORTH OF MAGIC MAKES A FINE BIG CAKE. AND YOU ARE SURE OF SUCCESSFUL RESULTS."

1212 Mrs. CLARRY HUNT, Chief Distributor for Gillett Products, Toronto

MAGIC costs so little! Just think—it actually takes less than 1¢ worth of Magic to make a delicious layer cake. Why take chances with doubtful baking powder? Bake with Magic and be sure!

MAGIC "CONTAINS NO ALUM." This statement on every tin is your guarantee that Magic Baking Powder is free from alum or any harmful ingredient.

MADE IN CANADA

Tests Not Reliable

Mushroom Pickers Must Know What They Are Gathering

Absolutely no reliance can be placed on the test often recommended for poisonous mushrooms, that if a silver coin placed in the utensil in which mushrooms are cooked tarnishes the mushrooms are poisonous. Both poisonous and edible kinds may turn silver dark.

Equally baseless is the belief that a mushroom is shown to be edible if the skin can be peeled from the cap readily, because peeling is possible for many poisonous species.

The notion that soaking or boiling poisonous mushrooms in salt water will render them harmless has no foundation in fact.

Some people have thought that the presence of insects on mushrooms is a proof of their edibility. This is a dangerous supposition, because insects infest the most poisonous as well as the best edible species of fungi.

The collector of mushrooms cannot depend on any simple test. If he intends to use them for food he must know what he is gathering. It is a comparatively simple matter to learn to recognize a few kinds of deadly mushrooms and certain edible ones. If he will gather only the kinds that are well known to him, a careful collector need not be afraid to gather wild fungi for food.

He should not be misled by attractive colors or pleasant tastes. A strip of wood in two, one part being retained by the treasury and the other being issued to the lender, who returned it when he repaid his loan.

It was the custom to store discharged tallies in the cellars of the House of Commons, and it was among them that the fire broke out. Paper acknowledgments were substituted for tallies in 1827.—News of the World.

In collecting and identifying mushrooms one must make a careful examination of the specimens while fresh.—U.S. Department of Agriculture.

Present Greater Threats

Lions Born In Captivity More Trouble To Trainers

Oddly enough the lions born and bred in captivity present greater threats to trainers than do jungle lion lions. Why? Because the jungle-bred lion, not having known humans in youth, fears and respects his master when at last they are brought in contact.

On the other hand captive-born lions usually are petted during babyhood. Everyone knows that familiarity breeds contempt, and nowhere is this more true than in our relationship with these magnificent beasts.

Behind the danger that is constantly present stands this one fact—the lion, no matter where, when and how born, is a wild animal. He always will be wild. He passes from babyhood at three years to the full-grown lion stage. After that, look out!—Pearson's Weekly.

Must Be Some Bird

Fred McKean, of New Kensington, Pa., a flock fowl with the head and feet of a rooster and the body of a duck. The bird walks like a penguin, has a chicken's ear of the water, and makes a noise that is new to the fowl world.

Father: Why won't you marry Charlie?

Daughter: I'll only marry a man who knows life and has learnt its sorrows.

"See—a widower."

Muse was devised by the gods to lure the sun-goddess from a cave where she had retired, according to Japanese legend.

The ENERGY VALUE of Cod Liver Oil

PLUS SPEEDY ASSIMILATION

With emulsified oils digestion begins at once in the stomach. Ordinary oils must first combine with the pancreatic juices—to form an emulsion—before they can be assimilated.

Scott's Emulsion is more quickly and easily assimilated than plain Cod Liver Oil because it is already emulsified. Scott's Emulsion is rich in body-building hypophosphates of lime and soda—PLUS values you get in Scott's Emulsion of Cod Liver Oil.

ROOSTERS FOR SALE

Purchased white Wyandotte Roosters for sale. April hatch 50c.; May hatch 70c. Apply H. L. Olson, 5 1/2 miles east of Lacombe on Alx Highway.

Bridge and Junior Lamps; Table Lamps, Bed Lamps. Also a wonderful assortment of shades. Lamp stands from \$4.00. Shades from 15c. up. Lacombe Furniture Store.

PLEDGE SUPPORT C.A.F. CLUB AGAIN

Support for the boys' and girls' beef club, which won Dominion and Provincial honors this season, was again promised at the annual meeting of the Central Alberta Short-horn Breeders' club which re-elected P. A. Switzer. The meeting decided to ask the board of trade to show some public recognition to Henry Magilton and Edward Chessor, champions who won the Junior Judging title at the Royal Winter fair in Toronto. H. E. Wilson, who was their tutor, was accorded appreciation for his work.

For 1935 similar rules will prevail except that calf weights should not exceed 1,000 and the showing will take place at the next bull sale. Archibald Elliott of Clive was cup winner this year.

Report of Mr. Wilson, secretary showed a good balance on hand. W. Sharpe, Stettler, president of the Alberta Short-horn Assn., gave a short talk. Executive elected: J. Biglands, W. Chessor, C. F. Dameron, M. Douglas, P. Jamieson, J. Laing, R. Petheridge, W. Sharp, H. Switzer, H. Talbot, S. Taylor, H. Trane, J. L. Walters, G. Walters, A. Durso, Fred Man and W. W. Sharpe, President of the Alberta Short-horn Breeders' Assn., spoke briefly and Mr. Durso was thanked for his services on behalf of the club. Mr. Sharpe announced that the meeting of the Provincial Association would be held on the evening of December 13th in the City Hall, Edmonton.

BOARD OF TRADE WILL BANQUET LOCAL WINNERS

A banquet is being planned in the near future to honor two boys, Edward Chessor and Henry Magilton, both of Lacombe, who were chosen as the best judges of beef cattle in all Canada at the recent Toronto Royal Fair. According to finale which were decided at Toronto last week, the Junior contests were one of the features of the show. The Lacombe boys had a score of 973 out of the possible 1000 points. It is planned to ask as guest speakers at this banquet, Mr. Brundson, Secretary of the recently organized Marketing Board. The functioning of the Marketing Board seems to be a very live question and as Mr. Brundson is familiar with its content, he is being asked to come and explain its workings.

NURSES HOME ROBBED

Sometime between 6 and 6:30 last Monday evening, the nurses home adjoining Lacombe Hospital was robbed. Miss Mae McLeod and Mrs. McGibbon \$27. The thief entered the place when all the hospital staff were at supper and the theft was not noticed until one of the staff had occasion to enter the home after supper, finding so near Christmas the loss is a severe one and it is hoped that the guilty person will soon be apprehended.

FOR SALE

1000 bushels of feed barley; some hay; fresh milk cow with heifer calf at side, grade Holstein. Apply O. H. Walker, Phone R2409.

HOCKEY SEASON STARTS

The hockey game on Tuesday night between Lacombe and Red Deer was very good, despite the soft ice and the fact that the teams had had very little practice. The Lacombe boys showed plenty of speed at times, and will undoubtedly go far in the league this winter. Red Deer won by a score of 7 to 3, but certainly had to work for their victory. For the first game of the season, the crowd was exceptionally large. The same support is asked for all the games. If you want the boys to win, give them your backing—they will not disappoint you.

AT THE AVALON

Double Feature: "To the Last Man". A story of adventure on the high seas and "As the Earth Turns" starring Jean Muir. This is taken from the book of same name and is a real picture.
Coming: "Babino", Dec. 13, 14, 15. "Thirty Day Princess" and "Night Club Lady", Dec. 20, 21 and 22.

Remember! The Cozy Barber Shop Watch Contest is now on. A chance given with every 20c. service.

NOTICE TO THE RATEPAYERS
OF M.D. CROWN No. 399
Those taxpayers who worked on the roads and have not assigned their wages over to be credited on taxes are requested to do so at once. They will then avoid penalties and in some cases earn discounts. If work is not assigned over by the taxpayer, the Secretary is unable to credit same.
E. WALTER SIMPSON,
Sec.-Treas. M.D. Crown No. 399.

ORANGE PEKOE BLEND

The Better Way

A news item containing only a few lines appeared recently in one of Western Canada's daily papers. It was not featured in big type nor with display headlines as murders, accidents, strikes, meeting of protest over relief quotas, etc., but it nevertheless recorded an event of real importance to the community concerned which might well be accepted and acted upon by other communities all over the country.

In order to provide a measure of relief assistance to people in need of it, the local authorities decided that, instead of continuing with a policy of giving direct relief to the exclusion of any and all other forms of assistance, they should provide a measure of work, and the news item to which reference is now made recorded the results, which, briefly, were:

One hundred miles of rural telephone lines badly in need of repair were re-constructed, the old poles cut off and re-set, ten rural systems were reduced to seven, the old wire and insulators thus saved were utilized to repair the lines on the seven systems, between 30 and 40 residents of the community were each given fifteen days work, and the only cash outlay for new materials was \$4.55.

Several highly important things were thus accomplished. First and foremost these men instead of being placed deeper in debt, as they would have been if merely handed direct relief, were given remunerative work which enabled them to discharge some of their past indebtedness. Secondly, the rural telephone systems which serve their own community were re-established for the benefit of the people there, and these systems likewise were again placed in a position as feeders to the long distance Government system. Thirdly, all the money expended, except \$4.55, went to the people of the district who most badly needed it, and no additional capital debt was placed on the rural telephone company, while the reduction of ten systems to seven should make for efficiency and less cost in operation.

It would appear to be gain to the people all round—in work provided, in past debts or taxes reduced, in increased and improved telephone service for the community and the probability of larger future revenues to the Government long distance system. It was worthwhile, constructive work without the imposition of any burden on the community.

Attention is called to this incident for one reason, and one reason only, and that is, to suggest to readers of this column, and in particular to those occupying some position of authority in their particular community, that they take a look around their own districts and see if there is not some kind of useful community work in which their own people in need of assistance could be employed to their benefit and to the benefit of the community as a whole.

There are other rural telephone lines in Western Canada badly in need of repair and rehabilitation; there are local roads that call for improvement; there are school buildings that require attention and repairs; there are other things, large and small, that have been neglected because of lack of funds. Why not make a survey of the community, and then organize the people to attend to all such matters, giving these in need of assistance an opportunity to work off burdensome arrears of taxes or earn a few dollars, instead of relying solely on the distribution of direct relief.

By the one method municipalities are placed in a stronger position financially because their tax arrangements are reduced; by the other both municipalities and its residents are placed deeper in debt. Furthermore, by the one method the community as a whole is bettered and improved and its services and institutions efficiently maintained, and the morale of its people strengthened; by the other neither the municipality nor its residents have anything to show for their action but the fact that they maintained their existence, leaving to the future the ultimate discharge of those liabilities.

What one community has done for its own advancement and the welfare of its people, many other communities can do, if they will. It requires thought, study, planning and organization, and a will to work. Meeting the absolute necessities of people through the distribution of direct relief is, no doubt, an easier way—for the time being. But sooner or later the burden must be carried, and paid off, and the longer the grappling with it is deferred the larger, heavier, and more difficult the burden becomes. Why not tackle it now in a forward-looking, constructive way?

One method, it may be said in conclusion, inspires few hope and confidence, with one good example encouraging another, whereas the other method leads to deeper discouragement and a loss of faith in the self-reliance and determination to provide self-help which is essential to the maintenance and further progress of any people and of all communities.

Faces Many Hazards

Modern Woman in Home Exposed to Skin Diseases

"The modern married woman is exposed to more skin hazards than the workman employed on a factory process," said Dr. W. J. O'Donovan, in an address at the Institute of Hygiene, London.

"The labor-saving devices in general use in the home are potent chemicals. The housewife will put her hands in mixed alkalis and then chloride on washing day, and follow it by cleaning brass with metal polish, which is a strong acid. She will then put cold cream of an unknown composition on her hands. The skin cannot stand this," he declared.

He said that dermatitis might be caused by innocent hobbies such as photography, wireless and gardening. He had over 6,000 new cases of skin disease in his clinic at the London Hospital every year.

Infantry Of Skies

Training Parachute Division Is New Idea Of Soviets

A new type of parachute infantry, trained for parading attacks on an enemy army's rear, is being developed by Soviet Russia's military command, says Gen. Francis Xavier Graziosi, of the Italian military mission, which recently returned from the U.S.S.R.

"We assisted at extensive experiments," said Graziosi on his arrival at home from the Red army maneuvers near Minsk. "Experiments in transporting entire armed divisions in airplanes and launching them by surprise in parachutes on the enemy's rear."

What this development may mean to nations which, like France, have spent billions fortifying their borders against ordinary attacks by land, is obvious.

Invented Many Useful Things

F. J. Sprague Died Recently in New York City

Frank Julian Sprague, inventor of the hi-speed elevator for skyscrapers, the multiple-unit system, which made subway and electric trains possible, and the electric trolley car, which supplanted horse and cable trams, died a few weeks ago at his home, 40 West Forty-fifth street, New York. He was 77 years old.

Mr. Sprague was a pupil of the late Thomas A. Edison, and, like his teacher, enjoyed the rare satisfaction of seeing his inventions put into universal practical use during his lifetime. The noise and smoke of steam-driven trains, vanished as the result of his genius, and building rose ever higher with the perfection of his fast and safe elevator.

He was born in Millford, Conn., and went to school at North Adams, Mass., and was then appointed to the United States Naval Academy at Annapolis, where he remained in the naval service until 1882.

After retiring from the navy he worked first as an assistant to Edison and then on an independent study of stationary motor development and its relation to electrical traction. He introduced a car with pivotal trucks during an experiment on the Manhattan Elevated Railway in 1886.

Mr. Sprague introduced the "multiple unit" system in the late '90s, when he took over a contract to electrify the South Side Elevated Railway line in Chicago. The device, now used on all subways, connects each car in the train, individually or collectively, with the control car.

He also sought to install electrical equipment on the subway, and he resided in New York, but failed to get the contracts. He electrified the transit of Florence, Italy, and Halle, Germany.

In 1911, with Edison present, he received the Edison Gold Medal of the American Institute of Electrical Engineers.

Among his most recent inventions was a plan to operate two elevators on one shaft. Safety devices prevent the two elevators from coming into contact with each other. The device, with the express ascending and descending at a faster rate of speed.

KRUSCHEN Strikes at the Usual Cause of

FAT

Try Kruschen at Our Expense

If excess, unhealthy fat is bothering you, take advantage of this offer to try Kruschen at positively no expense. Your druggist has a limited number of the Kruschen Giant Packages now in stock. This is the Regular bottle together with a separate TRIAL bottle.

Use the TRIAL bottle first. Kruschen eliminates waste and poisons from system—daily, if you follow the instructions. It strikes not only at the usual cause of fat but at the root of half the human internal sluggishness. If you have no excess fat, Kruschen will not cause you to lose weight. Kruschen costs only a few cents a week to use—and it makes you feel like a million dollars. Get your Kruschen Giant Package today. If you are not entirely convinced after using the Free TRIAL Bottle, your druggist will cheerfully refund your money when you return the Regular package unopened.

Honors For Canadians

Four Receive Rank in Order Of St. John Of Jerusalem

Insights of rank in the order of St. John of Jerusalem were conferred on several Canadians by the governor-general at Ottawa, following the first meeting of the Commander-in-Chief in Canada of the order.

Among those honored at the investiture were: Lieut.-Col. Herbert McLean, Montreal, admitted to the grade of knight of grace; Hon. John J. Kinley, Halifax, promoted to the grade of commander; Morris W. Wilson, Montreal, and John M. Imrie, Edmonton, admitted in the grade of commander.

Woman's Weakness

"I had a breakdown, the last time I was completely unstrung. I found myself at night and finally I began to get about the house. I had to be helped and I was so weak and nervous. After taking a few bottles of Dr. Pierce's Favorite Prescription I feel like a new woman. All thanks to Dr. Pierce's Favorite Prescription, N. Y."

Oldest Firm in World

Stora Kopparberg's Bergslags Aktiebolags, of Stockholm, Sweden, which has been found to be the oldest trading concern in the world is still actively in business and keeping up with the changing world. It has been operating since the twelfth century and has documents over 700 years old.

Gun Shoots Light Rays

Two inventors in France claim to have perfected a gun which will shoot "light rays" capable of paralyzing an aviator and bringing down his aeroplane. They say the rays can be generated to any intensity.

A device with a weight only one-thousandth that of a drop of water is used to measure heat of the stars.

W. N. U. 272

ARE YOU TROUBLED WITH NERVES?

Do you find it hard to go to sleep at night? Do you feel poorly rested in the morning, "jumpy" all day, and "ragged" by evening?

Then take Wincarnis. Here's a delicious wine, not a drug, that soothes nerves as nothing else can; that helps you quickly to sleep and makes your whole being with vibrant new energy. Wincarnis brings you all the valuable elements of grapes combined with the highest grade and guaranteed malt extract. Also as soon as you begin taking Wincarnis, you feel wonderfully better. This is because Wincarnis enriches your blood, soothes your nerves and creates lasting reserves of strength and energy.

Over 20,000 medical men have proved in practice the value of Wincarnis in cases of jumpy nerves, insomnia, nervous debility and general ill-health. Get Wincarnis from your druggist—Sales Agents: Harold F. Ritchie & Co. Ltd., Toronto.

Should Be Well Supported

St. Dunstan's Training School For Blind Doing Worthy Work

The nineteenth annual report of St. Dunstan's, the training school for blind soldiers, sailors and airmen in Regent's Park, London, shows that 19 new cases were admitted during the past year, blindness still super-vising as the result of gas and other war injuries after all these years. The number of cases under care, either in the institution or in their homes, is about 2,000, and these men have thousands of dependents.

It is significant that, as the report says, more importance is being attached to the Brighton Convalescent Home, maintained 15 years ago by the Federation of Great Britain Association of Great Britain. "More blinded soldiers," it states, "suffer illness and need a change and, as a result, more provision is being made for them. It has been decided to build up a fund to ensure the continuance of the home during the men's life-time."

The blinded masons, telephone operators and other commercial and business men, it is stated, have made progress during the last year and have to a great extent recovered from the depression. Most of the work has been found for all. At the same time, the home workers and craftsmen are still being assisted in every way with their occupations, and some 250,000 articles made by them were sold by St. Dunstan's last year.

This institution is for the veterans of the Empire, and many Canadians have found hope, health and work through its operation. The Canadian office is at the Canadian National Institute for the Blind, 100 Queen Street West, Toronto, and is deserving of the utmost in public support.—St. Thomas Times-Journal.

Recipes For This Week

(By Betty Barclay)

CANNED SWEET POTATOES

(Serves 6)
1 cup orange juice
1/2 teaspoon grated orange rind
1 cup water
1/2 cup sugar
3 tablespoons light corn syrup
1 teaspoon salt
6 to 8 sweet potatoes or yams

Combine first 7 ingredients and pour over peeled uncooked sweet potatoes arranged in casserole or baking dish. Bake covered in a moderate oven (375 degrees to 400 degrees F.) until tender, 30 to 40 minutes. Bake uncovered. Remove lid last 10 minutes to brown or put under blazer.

Variation: Just before removing from oven, add a layer of marshmallows and brown.

CHOCOLATE ORANGE TARTS

2 squares unsweetened chocolate
1 1/2 cups (1 can) sweetened condensed milk
1/2 cup orange juice
Grated rind of half an orange

2 oranges
8 baked tart shells
Melt chocolate in double boiler. Add sweetened condensed milk, stirring over boiling water until mixture thickens. Add orange juice and rind. Stir until thoroughly blended. Cut orange sections into small pieces, free from membrane, and arrange in baked tart shells. Cover with chocolate mixture. Top with whipped cream if desired.

Eel Damages Microphone

An electric eel, making its first radio appearance, knocked the microphone out of commission with dynamic personality. The radio staff, in the course of a broadcast from the St. Louis zoo, sought to demonstrate the peculiar way in which the eel that emits electricity. One announcer dangled his fingers in the aquarium and joined hands with a second, who touched the microphone. The eel turned loose its voltage and the microphone went dead.

The connective tissue is the most widely distributed tissue of the body.

Turns Waste To Profit

Berlin Is Using Every Scrap Of Its Litter And Garbage

With its litter and garbage Berlin is making 1,500 acres of suburban wasteland into a productive agricultural community, according to the Associated Press. The project has three purposes. To keep city clean, provide work, and—most important—carry on Germany's campaign against waste.

The Golmer Flats near Potsdam have been a dreary area overgrown with weeds, and the soil is infertile and stony, but its sandy soil is already responding to treatment with liquidized dust and refuse.

Each day 5,000 cubic yards of debris are brought in trucks and boats to the area. Some is burned. Another part, the solids and metals, is melted down for other uses. The rest is mixed with water and conveyed by huge pumps and pipes to the land.

Nothing is thrown away—the bottles, toys, bits of paper, table scraps, and the million other components of Berlin's waste products are sorted with a view to use again as fertilizer or items of trade.

Not Figure Of Speech

X-Ray Shows Apprehension Causes That "Sinking Feeling"

"That sinking feeling" in the pit of one's stomach isn't just a figure of speech. "Apprehension of mental shock causes the stomach to 'drop' and become 'flatter in contour,'" Dr. A. C. Ivy, of Northwestern University, Chicago, said in an address before the New York Academy of Medicine. "I personally have seen (by X-ray) the stomach of a student drop in response to a threat and rise again and resume motility on provoking laughter by passing the threat off as a joke."

A Good Imitation
"Did you ever hear anything so perfectly stunning?" asked the daughter as she turned the radio on to a new jazz tune.

"No," replied the father. "The nearest thing I ever heard to it was when a train loaded with empty milk cans had a collision with another train that was loaded with live ducks."

If you would have your breads and rolls rise well and evenly, do not allow the baking pans to touch each other, for air must circulate around each pan for best results.

Must Sell Butter By Net Weight

Inspectors Checking Up To See That Consumers Receive Full Weight

Recently inspectors of the Dairy and Cold Storage Branch of the Dominion Department of Agriculture have been making a check up on the weights of prints of butter in order to insure that the consumer is receiving full weight. This has disclosed that the legal requirements concerning the sale of butter are not being strictly observed by some vendors.

These regulations provide in Sub-section 3 (a) of Section 6 of Part I of the Dairy Industry Act that any butter intended for sale that has been moulded or cut into prints, blocks, squares or pats must be: "of the full net weight of one-quarter pound, one-half pound, one pound or two pounds, but nothing in this paragraph shall be held to apply to butter in rolls or lumps of indiscriminate weight, as sold by farmers."

The inspectors will continue the check up throughout Canada in order to see that consumers receive full net weight.

Mounties At Horse Show

Picked Men Give Musical Ride In New York

Thirty-four picked men of the Royal Canadian Mounted Police, under Superintendent J. M. Tupper, went to New York to take part in the New York horse show, where they put on their famous musical ride.

The horsemen from the Dominion also took part in the picturesque ceremony of the mashing of the colors of the British Great War veterans of America in New York.

Hard On The Widows

Stern regulations covering divorce and marriage have been issued by the Serb-Greek-Oriental Church through its synod. The most stringent of the regulations forbids widows to remarry until 10 years after the husband's death. A widower, on the other hand, must wait only 40 days before remarrying.

The old English pound was originally the weight of 7,680 grains of wheat taken from the middle of the ear and well dried.

Hearing Below Normal

Many People Are Slightly Deaf Without Realizing It

According to Dr. G. P. Crowden, well-known aural, many people are more or less deaf without realizing it. They imagine they can hear as well as other people.

There are 2,500,000 people in Great Britain whose hearing is below normal, and about 40,000 who are totally deaf. Five years ago rejection of army recruits for "middle-ear disease" were 41 per 1,000. Now the ratio is 50 per 1,000, and these same conditions have the list of causes of discharge within six months of enlistment. It is a serious fact that every man, woman and child of these two and a half millions is seriously handicapped in everyday life, employment or education by inability to hear perfectly.

These Modern Days

The latest medical incident is the removal of an appendix from a baby thirty minutes old. The pioneers used to end their lives possessing every organ with which they started existence but in these modern days a complete set is becoming more and more unusual.

How nature helps animals with camouflage is shown by the mice that live in the desert, white mice found in Florida's sand dunes, and mice almost black found in black lava fields.

Swollen Joints

often are a warning that your kidneys have become deranged and need attention. Don't suffer needless pain. Take Gin Pills to obtain relief and assist your kidneys to function properly.

TELL YOU HOW TO ROAST MEAT BETTER—and no pan-scraping afterwards

Line your roasting pan with Canapar Cookery Parchment. The fats and juices won't burn. The meat is more succulent—and you save yourself all the bother of scraping or scouring the pan afterwards.

You can cook three vegetables at once in the same pot—when you place each in a bag of Canapar. No odors escape. All the goodness is sealed in. Use only ONE burner and turn that down low. Save fuel! Boiled or steamed fish is better, and less work, cooked in Canapar.

Just rinse the sheet of Canapar and use it over and over again. It won't absorb odors. Many women use it for a dish cloth. It's just like silk when wet—is very tough and does not shed lint.

Approval Of Public Health Measures Under Federal Control Is Expressed By All Provinces

Seeking concerted action by the federal and provincial governments in matters of public health, Dr. Gordon Bates, general director of the Canadian Social Hygiene Council, made known the unanimous opinions of provincial authorities with a view to co-ordinated measures under Dominion authority, arrived at through a federal-provincial conference.

Dr. Bates declared that in the British North America Act the only reference to health was in subjects dealing with quarantine and establishment and maintenance of marine hospitals. Because of this, he believed there was "no good reason why the Dominion should not enter into full participation in any scheme for the promotion of health throughout Canada."

From each of the nine provinces came expressions of approval of co-operation along health lines.

Hon. G. M. Weir, provincial secretary for British Columbia, said his province "is anxious to co-operate with the federal authorities in the promotion of public health which we regard as the very cornerstone of national well-being," and declared "from the standpoint of scientific public health, provincial boundaries have little significance."

From Alberta came pronounced approval of Hon. George Hoadley, minister of health, that "there can be no question in regard to the desirability of representatives of the various provincial governments and the federal government meeting for the purpose of giving consideration to the many health problems confronting us, both provincially and nationally, the question of health is one which is vital not only to each of the provinces but to our country as a whole."

Hon. J. M. Uhrich, minister of public health for Saskatchewan, stated "there appears to be a definite place for the Dominion department of health in connection with the co-ordination of the various health activities, especially those relating to inter-provincial matters."

Premier John Bracken of Manitoba stated inter-governmental discussion of national health was "very desirable" although his government was not disposed to make any presentation public before the proposed conference.

Aid Spread Of Epidemics

Modern Transportation Facilities Carry Infection To Wide Area. "Where between 1945 and 1955, if not before, will be another widespread visitation of gripple, which will afflict the entire world."

That is the belief of Dr. James Torrens, senior physician at St. George's hospital, London. Writing in the "British Medical Journal," Dr. Torrens says: "These pandemic visitations spread with the precise speed of human inter-communication, and their range is only limited by the movements of humanity, so that at the present time, with airplane and other transport facilities, no part of the earth is likely to escape the malign influence."

In addition to the constant mild sporadic cases—the so-called gripple cold—gripple gathers its force together, every 30 to 40 years, exalts its virus and sweeps a contingent, or even the entire globe like a veritable destroying angel."

Dr. Torrens states that records show that there have been 15 big epidemic visitations of the "gripple" to Europe in the last 500 years. "Unfortunately," says this physician, "in view of our present ignorance concerning the causation of gripple, there is very little we can do to prevent the catastrophe."

Styles In Sheep Changing

Heavily Fleece Autumn Are No Longer In Demand

Even styles in sheep are changing. The place of the heavily fleeced, grumpy sheep is rapidly being taken by a new model of more generous proportions, says a bulletin from the University of Wisconsin. This is the explanation James J. Lacey of the university's College of Agriculture, to the fact that with modern heated homes and comfortable equipment for travel there is less demand for heavy clothing. The heavily fleeced animals, therefore, are being replaced by animals of the meaty type.

Canadians A Healthy Race

Canadians are healthier to-day than they have been for several years, according to Dr. T. M. MacEachern, of Calgary, president of the Canadian Medical Association, who was in Halifax with Dr. T. C. Routley, Toronto, general secretary of the association, having practically completed a Dominion-wide tour.

The famous physician Hippocrates observed that when symptoms of lockjaw develop ten days or more following a wound a patient is much more likely to recover than if lockjaw sets in promptly.

Moisture Meter For Grain

New Invention Is To Be Given Trials

An electrical moisture meter, invention of Dr. A. O. Store, Regina, will be put under tests of the National Research Council at Winnipeg. The tests, which will be tried on all moisture meter apparatus for the determination of moisture in grain, is preparatory to the system of electrical moisture testing of wheat to be installed by the board of grain commissioners.

Dr. Store's invention, on which he has worked many years and which has recently been perfected, is ready for the test, Frank J. C. Cunningham, secretary of the company, declared. Dr. Store, formerly to market the invention, stated.

Ten thousand dollars has been spent in the development of Dr. Store's equipment. Now perfected and ready for testing, it recently received the approval of D. D. Walker, prominent electrical engineer, of Regina. Mr. Walker is connected with electrical equipment manufacturers.

Arrangements are now under way for the manufacture of the electrical equipment of Dr. Store's moisture meter in England. The remainder of the equipment will be manufactured in Regina, Dr. Cunningham said.

Dr. Store's invention is a simple one, is based upon the resistance of moisture in wheat to an electrical current. This resistance is recorded on a meter and the reading is then worked out from a table of calculations, which gives a reading of the tested.

Outstanding characteristic of the moisture meter is its speed in determining moisture in grain. Dr. Store's equipment will be used to determine what other systems require hours to find.

Used at present widely for moisture determination are the Brown-Duval system and the oven test.

The Agricultural Situation

Special Report To Be Issued Early In January

"The Agricultural Situation" will again be the subject of a special report to be issued early in January, 1935. The report will contain information concerning agricultural conditions and markets both in Canada and other countries than was possible in the first report published last March will be provided.

Fourteen committees, the members of which are officers of the Dominion Departments of Agriculture, and Trade and Commerce, who are working in co-operation with representatives of the Provincial Departments of Agriculture and Agricultural Colleges, are preparing the report.

This year a greater effort is being made to secure more complete details on conditions in export markets and the nature of the competition which may be expected from other countries. The committee will submit the conclusions from the information they obtain at a conference to be held at the end of November, at which it is expected representatives of the different provinces will be present. The work this year, as last, is being carried on under the direction of a committee appointed by the National Advisory Committee on Agricultural Services.

The Visitor's Clock

People Who Call On Chairman Of C.R.C.B. Remember It

Everyone who calls on Hector Charlesworth, chairman of the Canadian Radio Broadcasting Commission, in his office at Ottawa, remembers the clock which stands on the director's table which he uses as a desk. It is a small clock on a big desk in an immense corner office on the top floor of the national research building. But though the clock is about the smallest object in the room, it cannot easily be forgotten by the visitor.

It is a handsome desk clock, but its dial is no different from the average clock face. Yet it remains a memory. For the clock faces, not the chairman of national radio broadcasting, but the visitor. And as the interview progresses, the interviewer constantly wonders why the clock was so placed. Soon it dawns on the visitor that it is to let him know that the chairman of the radio commission is a busy man and his time is valuable. The last thing the visitor remembers is the speed of the minute hand of Hector Charlesworth's clock. —Toronto Star Weekly.

Old Discipline Book

An ancient fifteen-year-old book has recently come to light. It is a Discipline Book in which were recorded the offences of messenger boys employed by London dock companies.

One lad was fined for neglecting to have his hair cut; another for drinking the milk intended for the clerk's tea; and a third for rowing about the dock in a boat when he should have been on his rounds.

A man who had taken a girl out to dinner when she was 18 net her when she was 40 and she looked as though she'd been out to dinner ever since.

Man—My wife is very busy. She's going to address a woman's club.

Neighbor—She's working on the address, I presume.

Man—No; the dress.

SECTION OF ONE OF THE FUNNELS OF THE CUNARD WHITE STAR LINER "QUEEN MARY"

—Cunard White Star Photo.

So large are the funnels of the new Cunard White Star Liner "Queen Mary" that three engines of the "Royal Scot" type could be placed side by side inside the funnel. The above drawing gives some idea of the size of each funnel. The big Cunarder was launched on Sept. 26 in Glasgow at a ceremony at which Her Majesty the Queen christened the ship.

The Story Of Civilization

Text Book For Schools Raises Controversy In Nova Scotia

An impending row between fundamentalism and modernism threatened to stir up educational and religious bodies in Nova Scotia as three church organizations continued to protest against a new text book, "The Story of Civilization," recently placed in the curriculum of Nova Scotia schools.

The book was "an unfair and insidious attempt to foster a pagan philosophy upon our children," reads a petition signed by 1,200 Sydney Presbyterians who called upon Premier Angus L. Macdonald to withdraw it.

"The Story of Civilization" was compiled for the curriculum committee by Victor P. Seary, of Halifax, a former executive of the department of education, and Gilbert Patterson, of Toronto, who taught history for several years in western collegiate schools. Dr. F. H. Sexton, president of the Nova Scotia Technical College, was chairman of the curriculum committee which chose the new books and leading educationists of the province were members of the committee.

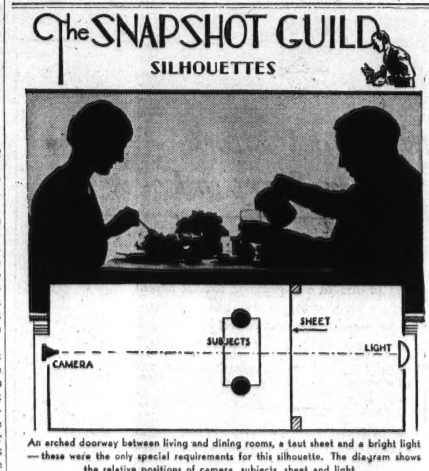

In an opening chapter man is described as appearing—"A primitive savage." The book adds: "We are told also that just as the clumsy wagons of earlier times have developed into the swift cars of to-day, so man has evolved from simpler and lower animal forms, reaching far back into the early life of our world."

This is a "dogmatic" declaration, Rev. Alexander Murray, of Sydney, N.S., declared, that man had come from brute ancestry.

The Nova Scotia text book controversy is similar to one that shook the United States in 1925 as a consequence of the "monkey trial" in Tennessee.

If new warfare is rubbed with fresh lard and then thoroughly heated in the oven before it is used it will not rust afterward.

Excavators have discovered coins dated in the 13th century near Ayr, Scotland.

An arched doorway between living and dining rooms, a test sheet and a bright light—these were the only special requirements for this snapshot. The diagram shows the relative positions of camera, subject, sheet and light.

With the advent of cooler weather, some snapshoters assume that the picture-taking season is over. And in so doing they miss a lot of fun and good pictures.

Matter of fact, with the new films and generally improved equipment, the snapshot season is continuous, winter as well as summer, indoors and out. We shall have much to say about the snapshot in this issue. Let's talk about snapshots—those pictures in which the figures are solid black on a white background, much like the X-ray pictures you see at fairs.

With snapshots, even more than with ordinary snaps, it is vital that the pictures tell their own story. (Unless, of course, you want simply a profile portrait.) For you have only outlines to work with, unsupported by perspective or detail.

To light up this background, a strong light must be put in back of it, about five feet away either centered or placed directly back of the major feature of the picture. You have a wide choice of lamps. You can use a couple of ordinary 60-watt

Straw As Fodder

Excellent When Supplemented With Some High Protein Feed

While straw is not generally considered as a nutritious feed for livestock, yet in times of fodder scarcity it is very valuable.

Horses and dry cows may be wintered entirely on straw, if supplemented by one-half to three-quarters of a pound of linseed oil meal a day, or other similar protein feed. A ration of half straw and half legume hay will carry such stock through the winter in excellent condition.

Little straw should be used for bedding this year when it is needed for feed. Good cut straw contains a considerable amount of total nutrients, though practically no protein. This is why straw alone makes a poor showing as an exclusive feed for livestock, but when supplemented with a little high protein feed, its carbohydrate content can be utilized to excellent advantage.

When feeding straw, always provide plenty of mineral matter in addition. Give cattle, horses and sheep free access to a mixture of 28 pounds of bone meal, 30 pounds of finely ground limestone, 20 pounds of salt, 2 pounds of iron oxide, one-half ounce of copper sulphate and one ounce of potassium iodide.

In feeding value, oat straw leads, with barley, wheat and rye straw following in the order named. Corn fodder, when harvested before the leaves dry up and blow away, is considerably more valuable than the straw of the small grains. Sweet clover straw, after threshing out the seed, is especially valuable in a year like this.

Orientalists Want Bibles During last year in Japan the circulation of the Bible was greater than in any year since the organization of the distribution agency in 1876, while in China the various Scripture distribution agencies circulated more complete Bibles than in any year since the beginning of evangelical effort in that field, the society reported. Not only in the Orient, but also in South America, was a boom in Bible distribution reported.

University Of London Buildings Will Cost Over Three Million Pounds

The new buildings of the University of London are being designed for 600 years. They will occupy a site in Bloomsbury, behind the British Museum. It is estimated that the total cost of the new buildings will be more than £3,000,000.

"In designing the buildings I have had to bear in mind that over a long period changes in educational methods may lead to necessary adjustments of the plan," said Mr. Charles Holden, the architect, the other day. "By special methods I have, therefore, aimed at making the interior capable of being adapted to changed requirements at will without affecting the external appearance. I have designed all the centres of sufficient strength to support partition walls at any point. It will thus be possible to be taken down and put elsewhere. Then I have designed a comprehensive network of electric light points for each floor. This will mean that however the shapes and sizes of the rooms are changed, it will always be possible to have electric lamps in the most suitable positions."

If ordinary foundations were attempted for the buildings they would have to be very deep and expensive for water collects on top of the London clay. To get over this difficulty all the new buildings are to be supported on concrete piles driven about 30 feet into the ground.—Overseas Daily Mail.

Thesis On Weather

Dr. Hopkins Studies Influence Of Weather On Growth Of Wheat

J. W. Hopkins, of the staff of the division of biology and agriculture, National Research Council laboratories, received notice that he had been awarded the degree of doctor of philosophy by the University of London. For the degree Dr. Hopkins presented a thesis on the influence of weather conditions on the growth and yield of wheat, the data used being obtained from agricultural experiment stations in the central and southern Saskatchewan and Alberta.

Dr. Hopkins underwent an oral examination in London a few weeks ago when on holiday leave from the council. His thesis will be published in the Canadian Journal of Research. Dr. Hopkins was graduated from the University of Alberta in 1929.

"I am going to publish a volume of my poems and do it under the name of John Smith."

"Well, that wouldn't be quite fair."

"Why not?"

"Just think of the thousands of innocent men who will be suspected."

JOHN VAN GUILDER.

Important Military Air Bases Are Being Considered For Protection Of Far-Flung Empire Outposts

Selling Canadian Scenery

Department Of The Interior Encouraging Travel To This Country From The U.S.

With a view to encouraging travel to this country from the United States, the Minister of the Interior supplied, during the 1934 travel season, 130 offices of automobile clubs in the leading United States cities with attractively mounted photographic views of representative Canadian scenes for window displays. Each set was accompanied by a printed invitation to members and non-members to "apply within" for maps showing main connecting highways between the two countries and booklets issued by the Department of the Interior on how to enter Canada, Vacationing in Canada, Canada Trips, Sport Fishing, and Hunting.

In every case the window displays aroused great interest and undoubtedly resulted in considerable numbers being induced to visit Canada during the vacation season. One automobile club in Pennsylvania wrote as follows: "The material was looked over with a lot of interest by sportsmen and others in this vicinity. My personal observation of travel to Canada during the year 1934, proves that the tourist is still interested in your country. We thought that the repeal of the 18th Amendment would lessen travel to your country but evidently this was not so."

Another in the District of Columbia made the following comments: "Have had the set in our window practically every day during the summer and it seemed as if every one of our members was making a trip to Canada." A hotel, in Illinois, stated: "The display attracted a lot of attention among members and others who stopped to make inquiry. We routed a number through Canada." A fourth, in Ohio, made the following remarks: "The pictures went over big, and I had several people stop to ask me how they enjoyed them and that they had stimulated an interest in, and urge to travel to Canada."

In view of the success of the undertaking it is proposed to expand the work by extending co-operation to other states and provinces. The travel bureau as have window display facilities. The beneficial effect from a tourist business point of view is quite obvious.

Designed To Last

University Of London Buildings Will Cost Over Three Million Pounds

The new buildings of the University of London are being designed for 600 years. They will occupy a site in Bloomsbury, behind the British Museum. It is estimated that the total cost of the new buildings will be more than £3,000,000.

"In designing the buildings I have had to bear in mind that over a long period changes in educational methods may lead to necessary adjustments of the plan," said Mr. Charles Holden, the architect, the other day. "By special methods I have, therefore, aimed at making the interior capable of being adapted to changed requirements at will without affecting the external appearance. I have designed all the centres of sufficient strength to support partition walls at any point. It will thus be possible to be taken down and put elsewhere. Then I have designed a comprehensive network of electric light points for each floor. This will mean that however the shapes and sizes of the rooms are changed, it will always be possible to have electric lamps in the most suitable positions."

If ordinary foundations were attempted for the buildings they would have to be very deep and expensive for water collects on top of the London clay. To get over this difficulty all the new buildings are to be supported on concrete piles driven about 30 feet into the ground.—Overseas Daily Mail.

A Welsh Klondike

London Syndicate Hopes To Re-Open Old Gold Mines

Traces of open casts, quarries and stones for crushing quartz discovered in Welsh gold mines prove them to have been worked by the Romans. Seven of these ancient gold-mines, tucked away in the folds of the Merioneth Mountains are to be reopened by a London syndicate, who hope, by utilizing modern machinery and engaging expert gold miners to establish a Welsh Klondike. In their palmist days, a few years before the war, Welsh mines yielded £1,000 worth of pure gold weekly; the wedding rings of the Queen and the Prince of Wales were made of Merioneth gold. Ore extracted from the Prince Edward Mine, near Dolgelly has on occasion assayed out at eight pennyweights of gold per ton which ranks it in richness of yield with the gold-bearing quartz of the Rand.

Something Worth While

Make yourself nests of pleasant thoughts. None of us yet know— for none of us have yet been taught in early youth—what fairy palaces we may build of beautiful thoughts, proof against all adversity; bright fancies, satisfied memories, noble histories, faithful sayings, treasures of precious and useful thoughts, which cannot disturb, nor pain make gloomy, nor poverty take away from a house that is without hands for our souls to live in.—Ruskin.

DID YOU EVER STOP TO THINK?

When you decide to patronize any one of the American owned chain stores do you ever stop to think what you are doing? Every cent of money made by the chain store is shared by the holders in the United States where the majority of the stock is owned. This money is lost to you and the community—you don't get a chance to get any of it back. And further, you think you are getting goods cheaper at the chain stores; but are you? From the investigation into the notorious methods used by the chain stores to spy the general public in Canada, you can easily figure out that you are the loser on nearly every transaction. You think you are saving a cent or a nickel on some of the goods priced low, out when an ounce or two is taken off a pound of tea or coffee, or half a pound off 20 lbs. of sugar; or an ounce off every can of fruit; when you are gipped in your change—you are not so far ahead are you?

Canned goods are put up specially for the American owned chain stores. Peas, corn, tomatoes, etc., while in standard tins contain two or three ounces more water than the brands carried by the independent dealers, and the same tactics are evident in nearly every other line.

The Stevens investigation now going on in Ottawa should surely have the effect of inducing Canadians to buy their goods from Canadian owned stores—stores owned and operated by citizens of your home town who cannot afford to gyp you.

ST. ANDREW'S UNITED CHURCH

Rev. R. B. Layton, Minister
Mr. L. D. Wright, Mus. Director
Service at 11 and 7:30.
At the evening service, a further study will be made of report of the Commission headed by Sir Robert Falconer on Christianizing the Social Order. Ways and means by which Christian principles may be applied will be shown. This Report is now being studied all over Canada. It is of interest to us in Lacombe.
The Young People's Society meets on Monday evening.
The Board of Managers will meet at the home of Mrs. Miesner on Tuesday evening at eight o'clock.
The Women's Fellowship Group meets at the home of Mrs. Miesner on Wednesday evening at 7:45.

Tannworth Bear \$10.00. Weaner \$2.00. J. Hutchison.

"...So that Our Visitors will be Sorry to Leave"

"If we are going to invite people to this country, we must be honest with them... Courtesy costs nothing and is one of our greatest tourist assets... Let us so treat strangers within our gates that it will be easy for them to come, pleasant for them to stay, and difficult for them to leave."

By Hon. R. B. BENNETT, Prime Minister of Canada, in the Canadian Association of Tourist and Publicity Bureau, November 6, 1934.

Canada's tourist activities represent more than a great industry from which everybody benefits. They provide an opportunity to create what the Prime Minister has described as "that feeling of neighbourliness" which is such a vital factor in building up cordial relations within the family of nations.

For both these reasons, may I urge upon the people of Canada the importance of showing consideration, courtesy and honesty to guests of our country? Let us all do those little acts of kindness which count for so much when one travels in a strange land.

We have a beautiful country. We must keep it so. We want our visitors to travel highways free from disfigurement, walk the streets of cities that are orderly and clean, and find at the end of every day's travel an inviting spot to rest. Canadians should turn their attention now to the important work of preparing for next year's tourist season.

As a nation, we are advertising abroad the attractions of Canada as a holiday land. We must see to it that our guests return home with only the happiest recollections—and the determination to come back again and again.

Nor should we forget, in planning our own vacations, that there are beauties to discover and friendships to be made in our neighbouring provinces. We live in one of the world's most glorious playgrounds—let us learn to know better the rich variety of its travel attractions.
